Medical University of Lublin
Al. Racławickie 1
20-059 Lublin

START YOUR MEDICAL CAREER WITH PROFESSIONALS

Our Midwifery degree meets both national and EU standards, as well as the requirements for medical education. This 3-year undergraduate program will prepare you for a challenging yet highly rewarding career as a midwife.

WHY MIDWIFERY AT MUL?

The practical classes and internships are designed so that the acquisition of practical skills in real-world conditions is preceded by the development of these skills through low-fidelity simulation training in obstetric and nursing skills laboratories at the Medical Simulation Centre. The practical classes and apprenticeships are conducted in various hospital wards, such as: labor wards, maternity and neonatal wards, pregnancy pathology wards, and gynecology wards. The practical training also takes place in primary midwifery care units, gynecological and obstetric clinics, as well as during antenatal classes and in breastfeeding clinics.

IF YOU WANT TO

acquire general knowledge in the field of medical sciences and detailed knowledge of the midwifery profession; learn how to provide healthcare services to women and their families during pregnancy, childbirth and the postnatal period; acquire skills that allow to recognize and monitor a normal pregnancy and assist in childbirth; detect abnormal conditions in the mother and child during pregnancy, delivery and the puerperium - **CHOOSE MIDWIFERY.**
Our Midwifery Program equips you with both essential medical knowledge and the practical skills necessary to practice as a midwife.

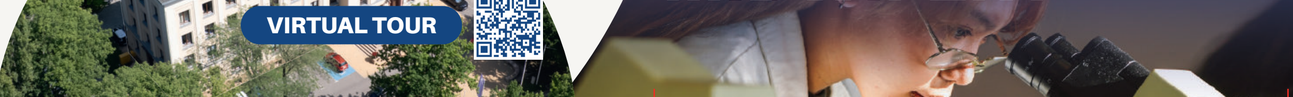

GRADUATE PROFILE

After completing the first-cycle studies in Midwifery, graduates are qualified to work in both public and private healthcare institutions. They can work in maternity units, birth clinics, physicians' offices, as well as in community-based midwifery and maternal care services.

DEGREE: BACHELOR OF MIDWIFERY
FORM OF STUDIES: FULL-TIME
LENGTH OF STUDIES: 3 YEARS

FACULTY OF HEALTH SCIENCES

MIDWIFERY

NURSING

DEGREE: BACHELOR OF NURSING
FORM OF STUDIES: FULL-TIME
LENGTH OF STUDIES: 3 YEARS

FACULTY OF HEALTH SCIENCES

Our Faculty boasts a long-standing tradition of educating nurses. The Nursing degree offered at MUL meets both national and EU standards, as well as the requirements for medical education. Through your studies with us, you will acquire the knowledge and skills that will enable you to work in a variety of healthcare settings.

WHY NURSING AT MUL?

The practical classes and internships are designed so that the acquisition of practical skills in real-world conditions is preceded by the development of these skills through low-fidelity simulation training in nursing skills laboratories at the Medical Simulation Centre. The practical classes and professional apprenticeships are conducted in various hospital wards, including: internal medicine, geriatric, surgical, pediatric, neurological, psychiatric, intensive care and long-term care wards, to name just a few. The classes also take place in outpatient clinics and hospices.

IF YOU WANT TO

acquire general knowledge in the field of medical sciences and detailed knowledge of the nursing profession; gain skills necessary to provide healthcare services to patients; learn how to provide comprehensive and individualized care for sick, disabled and terminally ill patients; learn how to educate patients on healthy lifestyles and disease prevention, as well as how to establish cooperation within healthcare teams - **CHOOSE NURSING.**

Our Nursing Program equips you with both essential medical knowledge and the practical skills necessary to practice as a nurse.

GRADUATE PROFILE

After completing the first-cycle studies in Nursing, graduates are qualified to work in both public and private healthcare institutions, such as hospital departments, clinics, nursing homes, hospices, and emergency departments.

STEP 5 Entry into the list of students for succesful candidates

Prepares students to provide professional medical care, educates on health promotion and psychological, social and ethical dimensions of healthcare. Provides with solid foundation in theoretical medical sciences, proficiency in clinical procedures and decision-making. During practical classes performed from the first year of the studies, not only will you learn clinical procedures and principles of medical ethics but also acquire communicative skills – one of the fundamental competences in a professional doctor-patient relationship.

WHY MEDICINE AT MUL?

We offer a smart-designed, complete study program in accordance with the latest standards of medical education worldwide. We employ effective didactic methods and technologies, such as simulation based education (SBE), problem-based learning (PBL) and medical cases. Since we believe in moving classroom exercises to real-life practice, our students work with patients in teaching hospitals.

IF YOU WANT TO

explore the functioning of the human body, geting to know its macroscopic and microscopic image and its complex processes, learn how to plan, conduct and evaluate preventive and therapeutic procedures, develop professional attitudes and behavior in the medical context, discover the nature of the doctor-patient relationship during summer clerkships, conduct scientific research - **CHOOSE MEDICINE.**

Our Medicine Program equips you with both expert medical knowledge and practical skills necessary to practise as a doctor. Graduates receive MD (Medical Doctor, lekarz) degree and they are prepared to work in hospitals, other public and private healthcare centers, scientific and research institutions and education. We also offer an opportunity to do clinical rotations in the US.

FACULTY OF MEDICINE

- DEGREE: MD (MEDICAL DOCTOR)
- FORM OF STUDIES: FULL-TIME
- LENGTH OF STUDIES: 6 YEARS

MEDICINE

DENTISTRY

FACULTY OF MEDICAL DENTISTRY

- DEGREE: DDS (DOCTOR OF DENTAL SURGERY)
- FORM OF STUDIES: FULL-TIME
- LENGTH OF STUDIES: 5 YEARS

WHY DENTISTRY AT MUL?

We offer a smart-designed, complete study program in accordance with the latest standards of medical dentistry education worldwide. Our students acquire both theoretical knowledge and hands-on experience in a modern, friendly and unified educational environment. We employ effective didactic methods and technologies, such as simulation based education (SBE), problem-based learning (PBL), tutoring and modern digital dentistry courses with virtual haptic training. Since we believe moving classroom exercises into real-life practice is very important, our students besides modern high-fidelity simulation courses also have opportunity to work with patients in dental hospital.

IF YOU WANT TO:

explore the functioning of the human body and symptoms of the oral mouth diseases of the cavity; learn how to plan, organize and conduct preventive and therapeutic dental activities; start working in complete dental team, develop the skills necessary to practice as a dentist, develop your communication skills; discover the nature of the doctor-patient relationship during summer clerkships - **CHOOSE DENTISTRY.**

Our Dentistry Program covers all dentistry branches and equips you with both expert medical knowledge and modern practical skills necessary to be able to practice as a dentist. Graduates of our dentistry Program receive European DDS (Doctor of Dental Surgery, lekarz dentysta) degree. They possess fundamental theoretical knowledge and skills that allow them to work in dental offices of various specialties. They are familiar with digital dentistry. They are also prepared to work in facilities related to health prevention. After graduating, they are ready to give all therapeutic dental activities at high quality level.
